EDUCATION

University of Cebu – Main Campus

Expected 2027

Bachelor of Science in Computer Science

- **Academic Honors:** Dean's List (Multiple Semesters).
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Machine Learning, Software Engineering.
- **Leadership:** University Student Officer (Sergeant at Arms), P.I.O on Peer Support Group, SSG
- Grade 12 Representative. Scrabble Team Leader

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, HTML/CSS, Python, C#

Frameworks: React, Node.js, Express, Pandas, Scikit-learn, Nest.js, Tailwind CSS, .NET

Tools & Tech: Git/GitHub, Docker, REST APIs, PostgreSQL, Figma

PROJECTS

Student App | Full-Stack Web Development

Early 2026

- Built a dedicated application to manage student organization tasks, event coordination, and disciplinary records.
- Implemented secure authentication and CRUD operations, allowing for real-time updates and data persistence for student leaders.

EducAlte | React, Node.js, TypeScript, Tailwind CSS

Early 2026

- Developing an AI-integrated educational platform designed to streamline student learning through automated resource generation.
- Architected a clean, scalable folder structure and implemented a responsive UI using Tailwind CSS for an optimal user experience across devices.
- Optimized front-end performance by utilizing modular React components and efficient state management.

Deep Purpose AI Assisted Biodegradation of Synthetic Polymers in Marine Environments

Late 2025

- Engineered a framework for analyzing the enzymatic degradation of synthetic polymers.
- Curated and processed datasets regarding pollutant biomagnification in marine environments to identify specific degradation agents
