EDUCATION

University of Cebu - Main Campus **Expected 2027**

Bachelor of Science in Computer Science

- **Academic Honors:** Dean's List (Multiple Semesters).
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Machine Learning, Software Engineering.
- **Leadership:** University Student Officer (Sergeant at Arms), P.I.O. on Peer Support Group, SSG Grade 12 Representative, and Scrabble Team Leader.

EXPERIENCE

Full Stack AI Engineer | Lifewood Data Technology **2026**

- Contributed to web interfaces, backend services, API integration, automated scraping, application debugging, and local feature testing.
- Coordinated project timelines, task allocation, stakeholder feedback, technical handovers, and team Git, integration, and deployment workflows.
- Created Power BI and Google Data Studio dashboards and presentations; applied prompt engineering and generative AI tools in technical workflows.

Freelance Designer & Developer **2024 - present**

- Combining intuitive, user-centered design with scalable web engineering for practical digital experiences.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, SQL, HTML/CSS, Python, C#
Frameworks:	React, Next.js, Node.js, Express, FastAPI, NestJS, Tailwind CSS, .NET, Pandas, Scikit-learn
Tools & Tech:	Git/GitHub, Docker, REST APIs, WebSockets, PostgreSQL, Prisma, Drizzle ORM, Figma, Mapbox/MapLibre
AI & Reporting:	Gemini API, AI agent integration, prompt engineering, Power BI, Google Data Studio, HeyGen, NotebookLM

GENERAL SKILLS

- Communication, teamwork, leadership, stakeholder alignment, documentation, and receiving and applying feedback.
- Project planning, task allocation, prioritization, technical handovers, organization, and following procedures.
- Problem solving, flexibility, multitasking, punctuality, fast learning, and working under pressure; SEO, AEO, GEO, and digital content distribution.

CHRISTIAN A. OSORNO

PROJECTS

EducAIte | React, TypeScript, Tailwind CSS **Early 2026**

- AI-assisted learning application with LLM-powered tutoring, study summaries, and planning in a responsive web interface.

FloodSense | React, Next.js, PostgreSQL, Gemini

- Full-Stack Developer & System Architect for a Metro Cebu geospatial platform combining community flood reports, interactive maps, and a domain-bounded AI safety assistant.
- Integrated rainfall, tidal proximity, elevation, and historical flood susceptibility into a multi-factor risk engine, with community voting and an offline assistant fallback.

Lifevent | Next.js, Prisma, Apify, Gemini **Collaborative**

- Contributed to the dashboard interface, scraper integration, automatic qualification pipeline, review queue, duplicate handling, bug fixes, and deployment documentation.

  Live demo | Source code | Implementation branch - Some features require login; testing-branch changes may not be deployed.

Elven Boutique | React, Express, PostgreSQL, Prisma

- Full-stack floral storefront and admin workspace with inventory restocking on cancellation, historical-data preservation, layered APIs, and jsPDF reports.

GourMate | React, Three.js, FastAPI, Gemini **Collaborative**

- AI cooking companion with conversational recipes, guided steps, ingredient substitutions, timers, multilingual speech, and Kef, an animated 3D chef.
- Team: Erica Gin Echavez, Christian Osorno, and Christian Kyle Ducay.

  Live demo | Source code

Student Registration App | React, Node.js, Express

- Registration application supporting enrollment, course management, student records, relational data storage, and server-side validation.

Sofia's Bubble's Laundry App | React, TypeScript

- Laundry management interface for order tracking, notifications, and inventory workflows.

Marine Biodegradation | Python, Machine Learning **Late 2025**

- University of Cebu - Main Campus: in-silico research exploring synthetic plastics degradation under ocean conditions through data analysis and machine learning.

Pasabuy | Figma, UX Research, UI/UX Design

- Shared-errand design exploration using user journeys, wireframes, and Figma interfaces for courier and commissioner flows.
